Hello Bob,

I have done some research on this issue. In looking through our files here, it doesn't appear as though we have the most recent correspondence. I have talked with our legal counsel and they are searching for their file, which has moved around in their shuffle of offices. The general consensus seems to be that recording a deed restriction for the portion of our right of way that has not been remediated is unacceptable to RCTC.

In talking with BNSF, it appears feasible to protect or remove a portion of the tracks in order for Sempra to do the remediation. This is the likely position that RCTC will take on this matter. Once legal counsel has located their file and I've had a chance to review, I will send you a formal response.

Thank you for your patience, please don't hesitate to call if you have any questions.

Bob,

The non-developed properties owned by the Riverside County Transportation Commission are now managed by the Right of Way Department.

For a response to this e-mail please contact Min Saysay. He can be reached at: (951) 787-7922 or e-mail: msaysay@rctc.org

Thank you,

Claudia

Hi Claudia,

Have you heard from your legal on the LUC?

Bob
